

David D. Duclos DVM, ACVD
Board Certified Dermatologist
Office: 425-742-0342
www.theasac.com

Before seeing Dr. Duclos, a thorough history of your pet will be obtained by one of the nurses. You will be asked several questions regarding your pet's history and current symptoms. Some of the questions that will be asked pertain to specific brands of food, treats, shampoo, etc. Please be prepared to answer the below questions which will allow us to obtain a more accurate and complete history.

1. What brand and flavor of food are you feeding your pet? (For example: Natural Balance Dry - Salmon and Potato)
2. A list of the treats you feed your pet. This includes table/"human" foods, rawhides, biscuits, etc.
3. If flea treatment is being used, what brand is it? (i.e. Frontline, Advantage, Program)
4. If your pet is bathed, what type of shampoo is used? If you take your pet to the groomer, if possible, call your groomer to find out what product they use.

We look forward to meeting you and your pet,
The Animal Skin & Allergy Clinic Staff
